SAFETY PRECAUTION

Carefully read and understand this manual before operating this machine. This machine must be grounded!

This machine shall be grounded while in use to protect theoperator from electric shock. Grounding provides a path of least resistance for electric current. This machine is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. Do not remove the ground pin under any circumstances.

This machine is for use on a nominal 120-volt circuit and has a grounding plug that resembles the plug illustrated in Figure. Make sure that the machine is connected to an outlet having the same configuration as the plug. No adapter should be used with this machine.

This machine is intended for commercial use. It is constructed for use in an indoor environment and is nor intended for any other use. Use only recommended accessories.

- 1. Do not operate machine:
- Unless trained and authorized.
- In flammable or explosive areas.
- With a damaged cord or plug
- If not in proper operating condition.
- Unless you have read and understand the operators manual.
- With the use of extension cords.
- In outdoor areas and standing water.

- 2. Before operating machine:
- Make sure all safety devices are in place and operating properly.
- 3. When using machine:
- Do not run machine over cord.
- Do not pull cord around sharp edges or corners.
- Do not handle plug with wet hands.
- Report machine damage or faulty operation immediately.
- 4. Before leaving or servicing machine:
- Turn off machine.
- 5. When servicing machine:
- Unplug cord from outlet.

- Do not pull machine by cord or plug.
- Do not unplug by pulling on the cord.
- Do not stretch cord.
- Keep cord away from heated surfaces.

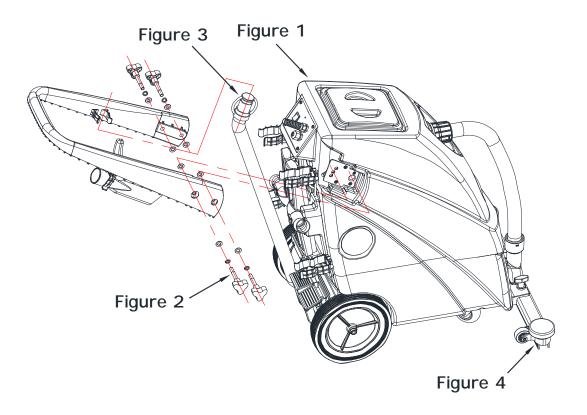

Unplug cord from outlet.

Use manufacturer supplied or approved replacement parts.

To avoid electrical shock, please replace the power cord immediately if any damage is being detected. The replacement must be performed only by an authorized person or by our customer service center.

Handle Assembly Instructions

Attaching Handle

- 1] Remove handle from ship position (Figure 1).
- 2] Realign handle as shown and screw knobs (Adjustable handle has three height](Figure 2).
- 3] Attach Drain hose (Figure 3).
- 4] Attach front mount squeegee (Figure 4).

Operation of Wet & Dry Vacuum

Read operators manual thoroughly prior to operating or servicing this machine.

Be sure that the handle is properly assembled on machine body prior to operating .

Wet Operation

- 1) Remove clear window and remove the cloth or paper filter form vacuum.
- 2) While clear window is removed, check to make sure that the float shut-off is unobstructed and fully functional.
- 3) Replace clear window on the top of the recovery tank.
- 4) Connect vacuum hose to inlet on the machine body.
- 5) Attach appropriate accessory tool for the job to be completed.
- 6) Make sure the Main Power Switch is in the OFF position, then plug power cord into a grounded outlet.

- 7) If using the front-mounted squeegee assembly, be sure that squeegee is attached to front of machine.
- 8) If using the front-mounted squeegee assembly, lower squeegee to the floor by depressing the left half of the pedal [rear of the machine] forward with your foot.
- 9) Turn power switch to "on" position.
- 10) During wet pickup, the float shut-off will automatically prevent water from entering the recovery tank once the recovery tank is full.

If foam develops in the recovery tank during wet vacuuming, use defoamer chemical to help eliminate the foam. Foam will not activate the float shut-off, and therefore, may cause vacuum motor damage.

11) To raise the squeegee assembly back to transport position, depress the right half of the pedal (rear of the machine) downward with your foot.

Dry Operation

- 1) If the machine has been used for wet pick-up, empty the Recovery Tank, rinse it out and dry it completely and install the Dry Container System. DO NOT use the machine for dry pick-up without the Dry Container System in place.
- 2) Remove clear window, and be sure the cloth or paper filter is properly installed.

Do not operate machine without bag or filter properly installed.

- 3) Replace clear window on the top of the recovery tank.
- 4) Connect vacuum hose to inlet on the machine body.
- 5) Attach appropriate accessory tool for the job to be completed.
- 6) Make sure the Main Power Switch is in the OFF position, then plug power cord into a grounded outlet.

Do not use an extension cord in conjunction with the standard power cord.

- 7) Turn power switch to "on" position.
- 8) Check the filter bag periodically to see if it is full. For optimal performance, replace bag when it is 3/4 full.

DRAINING THE RECOVERY TANK

- 1) Unplug machine from power outlet.
- 2) Transport machine to nearest floor drain of bucket.
- 3) Remove drain hose form rear of machine. Remove ball plug from drain hose, and drain the contents of the tank.
- 4) After the contents have drained, remove the clear window and rinse recovery tank with clean water.
- 5) Replace the ball plug on the drain hose and hang hose back on the rear of the machine.

To prevent odors in the recovery tank, remover the vacuum head when machine is not in operation to allow air to circulate.

MAINTENANCE

To keep the machine performing well for many years, please follow the following maintenance procedures.

Always confirm that the machine is unplugged prior to performing any maintenance or repairs.

- 1) Unplug machine as soon as you are done using it.
- 2) Check power cord for any damage. If any damage is detected, replace the cord immediately.
- 3) Lubricate casters with a water resistant lubricant every month
- 4) Check machine for loose or missing nuts and bolts, and replace as necessary.
- 5) Check the filter, and clean it after each use
- 6) Remove the vacuum hose and check it for any holes and clogs
- 7) Clean the outside of the machine with a mild cleaner

STORAGE

- 1) Unplug machine from power source and wrap cord on handle.
- 2) Store in upright position in a dry area.
- 3) Store with squeegee assembly off the ground.
- 4) Store with clear window off unit so that tank may breathe.

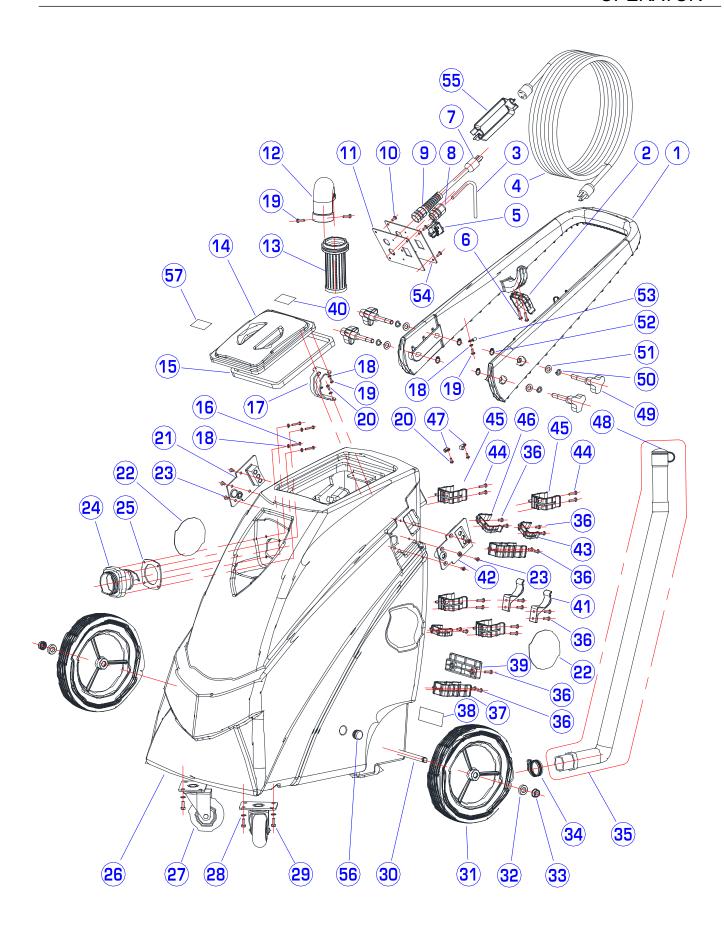

MACHINE COMPONENTS

- 1.Handle
- 3.Knob
- 5.3.5" Caster
- 7. Hose Assy
- 9.Clear Window
- 11.Drain Hose
- 13.Wire Hook

- 2. Crevice Tool
- 4.10" Wheel
- 6. Front mount squeege
- 8. Tank
- 10. On/off switch
- 12. Pedal

TECHNICAL DATA			
Model	iW90		
Voltage	120V		
Power	500W		
Current	5 A		
Frequency	50-60Hz		
Capacitor	90L		
Vacuum	1500mmH2O(60")		
Flow rate	2130L/Min(75CFM)		
Sound pressure level at workstation	70 dB(A)		
Weight	40kg		
Length of Power cord	15m		
Dimensions	117.6cm(L)X45.3cm(W)X110cm(H)		

Wiring Diagram iW90

WEAR &TEAR PARTS

DIA NO	PART NUMBER	DESCRIPTION	NO REQ'D
1	2320210	3.5" Caster	2
2	2320223	Wheel,10"	2
3	2320309	26" Blade	2
4	2320308	2" Wheel	2
5	2230126	Dusting Tool	1
6	2230113	Rubber Blade, Back	1
7	2230114	Rubber Blade, Front	1
8	2230127	Crevice Tool	1
